2. Once all Z Channel has been attached, use a spray adhesive (3M-90 or equal) to secure 2" Troy Wool to underside of ceiling surface fitting tight in between each channeling. The spray adhesive is to hold the Troy Wool in place until the Troy Board material is attached. Use a 10" serrated knife to cut the Troy Wool if cuts are required. Cover entire designated surface with Troy

3. Start layout of 1" Troy Board perpendicular to Z Channel. Start at the front of the ceiling with the 23 $\frac{5}{8}$ " side parallel to Z Channel. The board must sit flush against the Z Channel and the front side MUST BE LEVEL. Cover entire designated surface with Troy Board.

instead of fastener "B"

4. Using the supplied fasteners "B" and "F", attach Troy Board to Z Channel every 3" from all edges and side. Field placement is at every furring element in a straight line. There are typically 10 fasteners per Troy Board. Troy Board is a finish acoustic material. Make sure joints are tight. Troy Board is to be installed without edges damaged. Troy Board may be cut using a circular saw, hand saw, or reciprocating saw type. The Troy Board is manufactured with Portland cement; thereby dust will be created when using a circular saw.
